

CASE STUDY

Biocomposites[®]

————— *The Next Regeneration[®]*

Biocomposites is a biomedical company that designs, manufactures, markets and sells ground breaking products. Its leading technology, Stimulan[®], is a patented biomaterial used internationally by surgeons to combat infection associated with osteomyelitis, diabetes, surgery and haematogenous complications.

Biocomposites has purpose designed and built, sales training and manufacturing, laboratory and administration facilities at its international headquarters at Keele University Science and Business Park. Its R&D programmes are co-ordinated with a number of universities in the UK and USA.

Sales and distribution of the infection treatment and bone regeneration products are also directed through group operations in Wilmington, North Carolina and Shanghai, China.

Biocomposites employs over 50 people in the UK and 90 people worldwide.
